Overseeding mix with Sustane Regular particle size

Product Features

- Premium mixture of 50% organic base fertilizer 40% turfgrass seed and 10% leaf litter compost.
- Seed composed of 22% Kentucky bluegrass, 48% Perennial ryegrass and 30% Creeping red fescue.
- Formulated for overseeding established lawns, starting new lawns and repairing bare spots.
- Research has shown that Sustane stimulates soil microbial activity which is beneficial for turfgrass

Suggested use

- **Bare Sport Repair or New Lawn:** Loosen the top 5 to 7.5 cm (2 to 3 inches) of soil and apply at a rate of 3.5 lb/1,000 ft². Best results occur when area is then lightly rolled to help maintain soil moisture around new seedlings.
- **Overseeding:** Mow grass closely and then loosen the top 6 mm (1/4 inch) of soil in thin areas. Apply at a rate of 1.2 lb/1,000 ft² using a broadcast spreader. Best results occur when a topdressing material is added over top of the overseeding mixture to help maintain moisture around new seedlings.
