70% UMAXX® + Fe & Micros

Water soluble fertilizer for greens, tees and fairways.

Product Features

- 70% of the nitrogen is from UMAXX® stabilized nitrogen. UMAXX® contains two inhibitors that reduce nitrogen loss to ammonia volatilization and nitrate leaching.
- 7% of the nitrogen is in a quick-release form from potassium nitrate.
- 55% of the potassium is from sulfate of potassium and 45% is from potassium nitrate.
- Contains a full, chelated micronutrients package.

Turf Benefits

- According to research, at least 30 percent of the nitrogen from urea can be lost to the atmosphere through volatilization within days of application.
- Urease inhibitor in combination with the nitrification inhibitor in UMAXX® urea significantly increases nitrogen absorption by turfgrass to provide uniform growth, deep root mass and consistent color intensity over 12 to 16 weeks.
- Contains a balanced mixture of boron, copper, iron, manganese and zinc to prevent nutrient deficiencies. Particularly useful in sandy soils.
- Iron provides deep green color without excessive top growth.

Directions For Use

- Read the entire label before use.
- Apply only as directed during the growing season.
- Watering after application will accelerate initial green-up.
- Nutrite encourages responsible use of our products. Help do your part in protecting our rivers and lakes by following label indications and cleaning driveways and walkways after application. Do not apply to frozen ground.
- In order to ensure compatibility with pesticides and spray adjuvants, do a jar test prior to tank mixing. Use adequate volumes if adequate water quality is not possible, warm water will aid solubility.
