

EcoClear®

FAST ACTING WEED AND GRASS KILLER

Product Features

- For non-selective control of herbaceous broadleaf and grass weeds in non-crop areas, right-of way and industrial land sites.
- EcoClear is a postemergent, foliar active, vegetation management product formulated to contain organic acids that are components of vinegar and lemon juice. It is non-selective to green foliage and non residual in soil.
- **GUARANTEE:** acetic acid 25% w/v. (250 g/L)
- **REGISTRATION NO.** 25528 PEST CONTROL PRODUCTS ACT
- **ANNUAL WEEDS CONTROLLED:** Ragweed spp, Chickweed, Lamb's-quarters, Black Medic
- **SUPPRESSION OF PERENNIAL WEEDS:** Dandelion, Plantain spp, Clover spp., Wild Carrot, Toadflax, Quack Grass. Tufted Vetch, Hawkweed spp., Curled Dock.

Instructions

- READ THE LABEL BEFORE USING.
- Best results are achieved from spring and early summer applications to actively growing young weeds.
- Degree of control depends on several factors, including size and stage at application. Small annual weeds may be completely controlled with a single application. Control of larger, more established weeds, not completely desiccated with one application may be short-term and require retreatment. Weeds that are mature, dormant or hardened due to moisture stress tend to be more tolerant to herbicide treatment.

Packaging

- 10 L and 208 L

Application Rate

FOR CONTROL OF LARGER ANNUAL WEEDS AND TOP GROWTH REDUCTION (SUPPRESSION) OF PERENNIAL WEED GROWTH. Mix a spray solution consisting of 1 L of product for each 2.25L of water. Use an application system, solution volume and adequate spray pressure to ensure complete coverage of unwanted vegetation. Best results with larger weeds will be achieved by spot treatment. For broadcast application use a solution volume of 750 to 1250 L/ha. Retreatment is required for regrowth of perennial weeds .

Precautions

- KEEP OUT OF REACH OF CHILDREN.
- CAUTION: SKIN IRRITANT
- DANGER: CORROSIVE TO EYES
