

0.13% Dithiopyr herbicide

Granular with dithiopyr herbicide

Premium Grade (SGN 200)

Product Features

- Granular 0.13% Dithiopyr Herbicide provides season-long control of crabgrass and control or suppression of listed annual grasses and broadleaf weeds in established lawns and ornamental turf, including golf course fairways, roughs and tee boxes, and in established landscape ornamentals.
- This product also provides postemergent crabgrass control up to the 4-leaf stage.
- Low-dust

Product Characteristics

Product Code:	P000259
Product Type:	Dithiopy Granular Herbicide
Particle Size:	Premium SGN 200
Net Weight:	50 lb
Bulk Density:	67 lb/ft ³
Coverage:	11,360 ft ² @ 4.4 lb/M

PRECAUTIONARY STATEMENTS

Hazards to Humans & Domestic Animals

CAUTION: Harmful if inhaled. Causes moderate eye irritation. Avoid breathing dust. Remove and wash contaminated clothing before reuse. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Wear long-sleeved shirt and long pants, socks, shoes and chemical-resistant gloves such as natural rubber. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals.

FIRST AID: IF IN EYES:	<ul style="list-style-type: none">Hold eye open and rinse slowly and gently with water for 15-20 minutes.Remove contact lenses, if present, after the first 5 minutes.Continue rinsing eye.Call a physician or doctor for treatment advice.
IF ON SKIN OR CLOTHING:	<ul style="list-style-type: none">Take contaminated clothing off and place in a separate bag.Rinse skin immediately with plenty of water for 15-20 minutes.Call a poison control center or doctor for treatment advice.Do not get anything on or near the face.Do not eat, drink, or use tobacco products while wearing contaminated clothing.
IF SWALLOWED:	<ul style="list-style-type: none">Call a poison control center or physician immediately for treatment advice.Do not give anything by mouth to an unconscious person.Move person to fresh air.Call a poison control center or physician immediately for treatment advice.Do not induce vomiting unless told to do so by the poison control center or physician.
IF INHALED:	<ul style="list-style-type: none">Move person to fresh air.Call a poison control center or physician immediately for treatment advice.Do not give anything by mouth to an unconscious person.
HOT LINE NUMBER	Have the product container or label with you when calling a poison control center or doctor, or going to a hospital. For 24-hour emergency information call the National Poison Telecommunications Network at 1-800-655-2776.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and highly toxic to other aquatic organisms including oysters and shrimp. Use with care when applying to turf areas adjacent to any body of water. Do not apply directly to water, or to mark where surface water is present, or to intertidal areas below the mean high water mark. Drift and runoff may adversely affect aquatic organisms in adjacent aquatic sites. Do not apply when weather conditions favor drift from treated areas. Do not contaminate water when disposing of equipment washwaters.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

GENERAL INFORMATION

Granular 0.13% Dithiopyr Herbicide provides season-long control of crabgrass and control or suppression of other annual grasses and broadleaf weeds in established lawns and ornamental turf, including golf course fairways, roughs and tee boxes. Apply this product only to seeded, sodded, or sprigged turf that is well established. Before the use of Granular 0.13% Dithiopyr Herbicide, roots must be developed and the turf mowed at least twice to a uniform height. Injury may result if the turf is not well established, or stressed by weather, pests or other conditions.

USE RESTRICTIONS

- Do not apply more than 8.8 lbs./1,000 sq. ft. (0.5 Lbs./Alvacre) per application.
- Do not apply more than 26.4 lbs./1,000 sq. ft. (1.5 Lbs./Alvacre) per year.
- In New York, do not apply more than 8.8 lbs./1,000 sq. ft. per year.
- Do not use clippings from treated turf for animal feed or for mulching around vegetables or fruit trees.
- Do not use clippings from treated turf for animal feed or for mulching around birds, animals, or plants.
- Keep people and pets off treated areas until dust has settled.
- Do not use on golf course putting greens.

CRABGRASS CONTROL

Granular 0.13% Dithiopyr Herbicide provides pre-emergence control of crabgrass (large, smooth, and southern species) when applied prior to emergence of crabgrass from the ground. In addition, this product provides "early post-emergence" control during the early stages of growth after crabgrass emerges from the ground. This early post-emergence crabgrass control is limited and post-emergence applications are only effective if applied before crabgrass has displayed its 3-leaf or first tiller (which generally corresponds to the time when you can first see the crabgrass plants in the lawn). Early post-emergence crabgrass control allows for a 2 to 4 week longer period for application to obtain crabgrass control.

APPLICATION INSTRUCTIONS

Granular 0.13% Dithiopyr Herbicide may be applied to established turfgrass species listed on this label. The following turfgrass species are tolerant to this product when applied as directed:

TURFGRASS	USE PRECAUTIONS
Creeping Bentgrass (<i>Agrostis perennis</i>), Kentucky Bluegrass (<i>Poa pratensis</i>), Tall Fescue (<i>Festuca arundinacea</i>), Perennial Ryegrass (<i>Lolium perenne</i>), Bahiagrass (<i>Paspalum notatum</i>), Bitter Bluegrass (<i>Paspalum distichum</i>), Biolograss (<i>Bouteloua curtipendula</i>), Carpetgrass (<i>Axonopus compressus</i>), Centipedegrass (<i>Eremochloa ophiuroides</i>), St. Augustinegrass (<i>Stenotaphrum secundatum</i>), Zoysiagrass (<i>Zoysia japonica</i>)	1. Turfgrass injury may result from the use of this product on certain varieties of creeping bentgrass and Washington. Not all varieties of creeping bentgrass have been tested. Do not apply this product to Colonial Bentgrass (<i>Agrostis tenuis</i>) or to any other variety of creeping bentgrass. 2. Turfgrass injury may result from use of this product on the following varieties of Fescue such as Atlanta, Banner, Beauty, Blight, CF-2, Jamison, Marquis, Mow, Penobscot, Tanager, Tallera, Wolfrott and Waldra. Not all varieties of Fescue have been tested. Do not use this product on seedling or young turfgrass until the turfgrass is fully green and establishment until the turfgrass is fully green.

NOTE: Not all turfgrass varieties are tolerant to this product. It is suggested that the user evaluate the tolerance of turfgrass varieties not listed on this label on a limited area, at recommended use rates, prior to initiating large-scale use. For best results, apply Granular 0.13% Dithiopyr Herbicide within a few days after mowing and delay mowing again for a few days after application. Control of crabgrass and other weeds may be reduced if rainfall or ½ inch of irrigation or sprinkler irrigation. Weed control may be reduced if rainfall or irrigation does not occur within 30 days after application. Split, or half rate applications spaced 5 to 10 weeks apart may also enhance weed control. Cultural practices such as aeration and de-thatching should be completed and the turf allowed to recover before application of this product.

APPLICATION TIMING

This product may be applied as a single application, split application, or as a sequential application for crabgrass control in the spring, summer, or fall as described below.

SPRING APPLICATIONS:

For single applications in the spring or early summer, this program will provide 3 to 5 months of pre-emergence control of crabgrass. This program should not be used for early post-emergence control of crabgrass. Program 2: For pre-emergence control at sites where the turf is mowed relatively low, such as golf course fairways, and where turfgrass maintenance and weed control applications were not made the previous year. This program will provide 4 to 6 months of pre-emergence control of crabgrass.

FALL APPLICATIONS: Granular 0.13% Dithiopyr Herbicide may be applied in late summer or early fall (late August through November). Follow the instructions for "Program 2" for crabgrass control through the end of the next spring. Fall applications may be followed by an appropriate spring application to provide season-long control.

TABLE 1: APPLICATION RATES FOR CRABGRASS CONTROL

REGION	PROGRAM 1 Pre-emergence (high-cut turf)	PROGRAM 2 Pre-emergence (low-cut turf) Post-emergence
North (all areas)	2.2 lbs./1,000 sq. ft. (0.66 lbs./Alvacre)	4.4 lbs./1,000 sq. ft. (1.32 lbs./Alvacre)
Transition (DE, MD, VA, southern PA, OH, and coastal areas of NC, SC, TN, and TX)	3.25 lbs./1,000 sq. ft. (0.98 lbs./Alvacre)	6.5 lbs./1,000 sq. ft. (1.95 lbs./Alvacre)
Southern (AR, AZ, CA, GA, LA, MS, NC, NM, NV, OK, SC, TN, and TX)	4.4 lbs./1,000 sq. ft. (1.32 lbs./Alvacre)	8.8 lbs./1,000 sq. ft. (2.64 lbs./Alvacre)
Coastal South (FL, AL, GA, LA, MS, NC, SC, and TX)	7.95 lbs./1,000 sq. ft. (2.39 lbs./Alvacre)	15.9 lbs./1,000 sq. ft. (4.77 lbs./Alvacre)

SPLIT OR SEQUENTIAL APPLICATIONS

Split or sequential applications may be used to provide improved weed control or to provide extended weed control in areas with long growing seasons. Split applications may be made with rates in Table 1 above being split between two applications made 5-10 weeks apart. Where longer periods of control are required, sequential applications may be made in late summer or fall following a spring application or in the spring following a fall application provided the maximum application rate per year is not exceeded. Refer to the "Use Restrictions" section above.

RESEEDING, OVERSEEDING OR SPRIGGING

Reseeding, overseeding, or sprigging of treated areas within 16 weeks after application of this product may inhibit the establishment of desirable turfgrasses. For best results, use cultural practices such as soil cultivation, irrigation, and fertilization, at least 6 weeks before overseeding or sprigging with seed (or sod) and seeders for good seed-to-soil contact.

CONTROL OF OTHER GRASS AND BROADLEAF WEEDS

SPRING APPLICATION: When used as directed for crabgrass control in spring, Granular 0.13% Dithiopyr Herbicide will also control or suppress the following weeds when applied prior to their emergence:

WEEDS CONTROLLED
Barnyardgrass, Broomrape (annual roughstalk), Cocksfoot (annual roughstalk), Foxtail (yellow & green), Goosegrass, Knotgrass, Knotgrass (common), Spurge (annual & perennial), Spurge (perennial), Spurge (spotted)

FALL APPLICATION: When used as directed for late summer or early fall use, for crabgrass control through the early part of next spring, Granular 0.13% Dithiopyr Herbicide will also control or suppress the following weeds when applied prior to their emergence:

WEEDS CONTROLLED
Barnyardgrass (annual roughstalk), Broomrape (annual roughstalk), Cocksfoot (annual roughstalk), Foxtail (yellow & green), Goosegrass, Knotgrass, Knotgrass (common), Spurge (annual & perennial), Spurge (perennial), Spurge (spotted)

APPLICATION EQUIPMENT AND INSTRUCTIONS
This product may be applied with spot or rotary-type spreaders designed to apply granular herbicides. For best results, apply this product evenly and uniformly avoiding streaking, skips or overlaps. Avoid the use of spreaders that tend to apply granules in narrow rows or concentrated bands. Settings shown on the manufacturer's instruction label spreader settings may require adjustment to deliver the recommended application rate under actual application conditions. The desired calibration setting may be marked or recorded for future reference.

Apply this product uniformly over the treatment area. More uniformity can be achieved by applying one-half of the required amount of product over the treatment area and then applying the remaining one-half of the required amount of product over the remaining area. Clean and lubricate spreader after use. Verify calibration and proper functioning.

SPREADER SETTINGS to apply the listed pounds of product per 1,000 square feet

Spreader	2.2 lbs./1,000 sq. ft.	3.25 lbs./1,000 sq. ft.	4.4 lbs./1,000 sq. ft.	6.5 lbs./1,000 sq. ft.	8.8 lbs./1,000 sq. ft.

This product may stain driveways, walks, patios, pools, etc. Thoroughly wash or sweep off immediately after each use.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. Store in original container in a locked storage area out of reach of children and domestic animals. **PESTICIDE DISPOSAL:** Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. **CONTAINER DISPOSAL:** If empty: Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available. Do not rinse unless required for recycling. If recycling is not available: then dispose of container in a sanitary landfill or, if allowed by State and local authorities, by burning. If burned, stay out of smoke. If partly filled: Call your local solid waste agency for disposal instructions. Never pour unused product down any indoor or outdoor drain.

CONDITIONS OF SALE AND WARRANTY

This product is sold as a pesticide. When used as directed, it is guaranteed to kill the target weeds when the product is used in accordance with the directions on the label.
